

SOFTWARE DEVELOPER POSITION

The position is for a student developer, rate \$14.32/hour with the Population Health Research Institute. Full-time until the end of August.

PURPOSE: To design and build a cross-platform (iOS-ResearchKit and Android compatible) app for the Canadian TrialMyApp study: the PHRI study is intended to evaluate the feasibility of performing automated randomized controlled trials (RCTs) of other mHealth apps using TrialMyApp as a platform for recruitment, consent, randomization, and outcome collection.
