University**

## Abstract

Gameplay is a conversation, and as such is a vehicle for ideological exploration. While video games by themselves as technologies do not produce new violence onto its players, I argue that in order to map the stages of gameplay that affect players, we must see political gameplay as a conversation made up of multiple ingredients: the player, the game, and the political. Each ingredient is fundamental in creating a final output: a racist, misogynist, or anti-progressive political narrative.

Hence, the object of study here is the process by which players and games reproduce a political worldview from their involvement in the emergent narrative. In doing so, I outline how spotting political conversations between player and game allows us to trace the processes which produce political features of play. This mobilises the player to digitally enact and perform far-right play, concretize the political identities of its player, and outline the breadcrumbs that lead the player towards far-right recruitment.

To do this, I highlight the possibility of political conversation with games through two qualitative case studies from two seemingly different games: Angry Goy II (AG2), developed with politics at its forefront; and Red Dead Redemption 2 (RDR2), which allows the players to “do whatever they want”. AG2 allows political narratives via politically-charged game challenges, whereas RDR2 allows the player to bring in politics through politically-charged player actions. In either case, the emergent narrative allows the player and game to playact with politics, whether intended to or not.

## **Content note**

There will be a lot of discussion about **violence and harassment, misogyny, homophobia, transphobia, and racial violence**

You failed to save the West...

- Will the game turn me into a right-wing individual?
- Will I feel the need to take these violent politics and practices offline?
- And, am I actually now right-wing and infiltrating this conference?

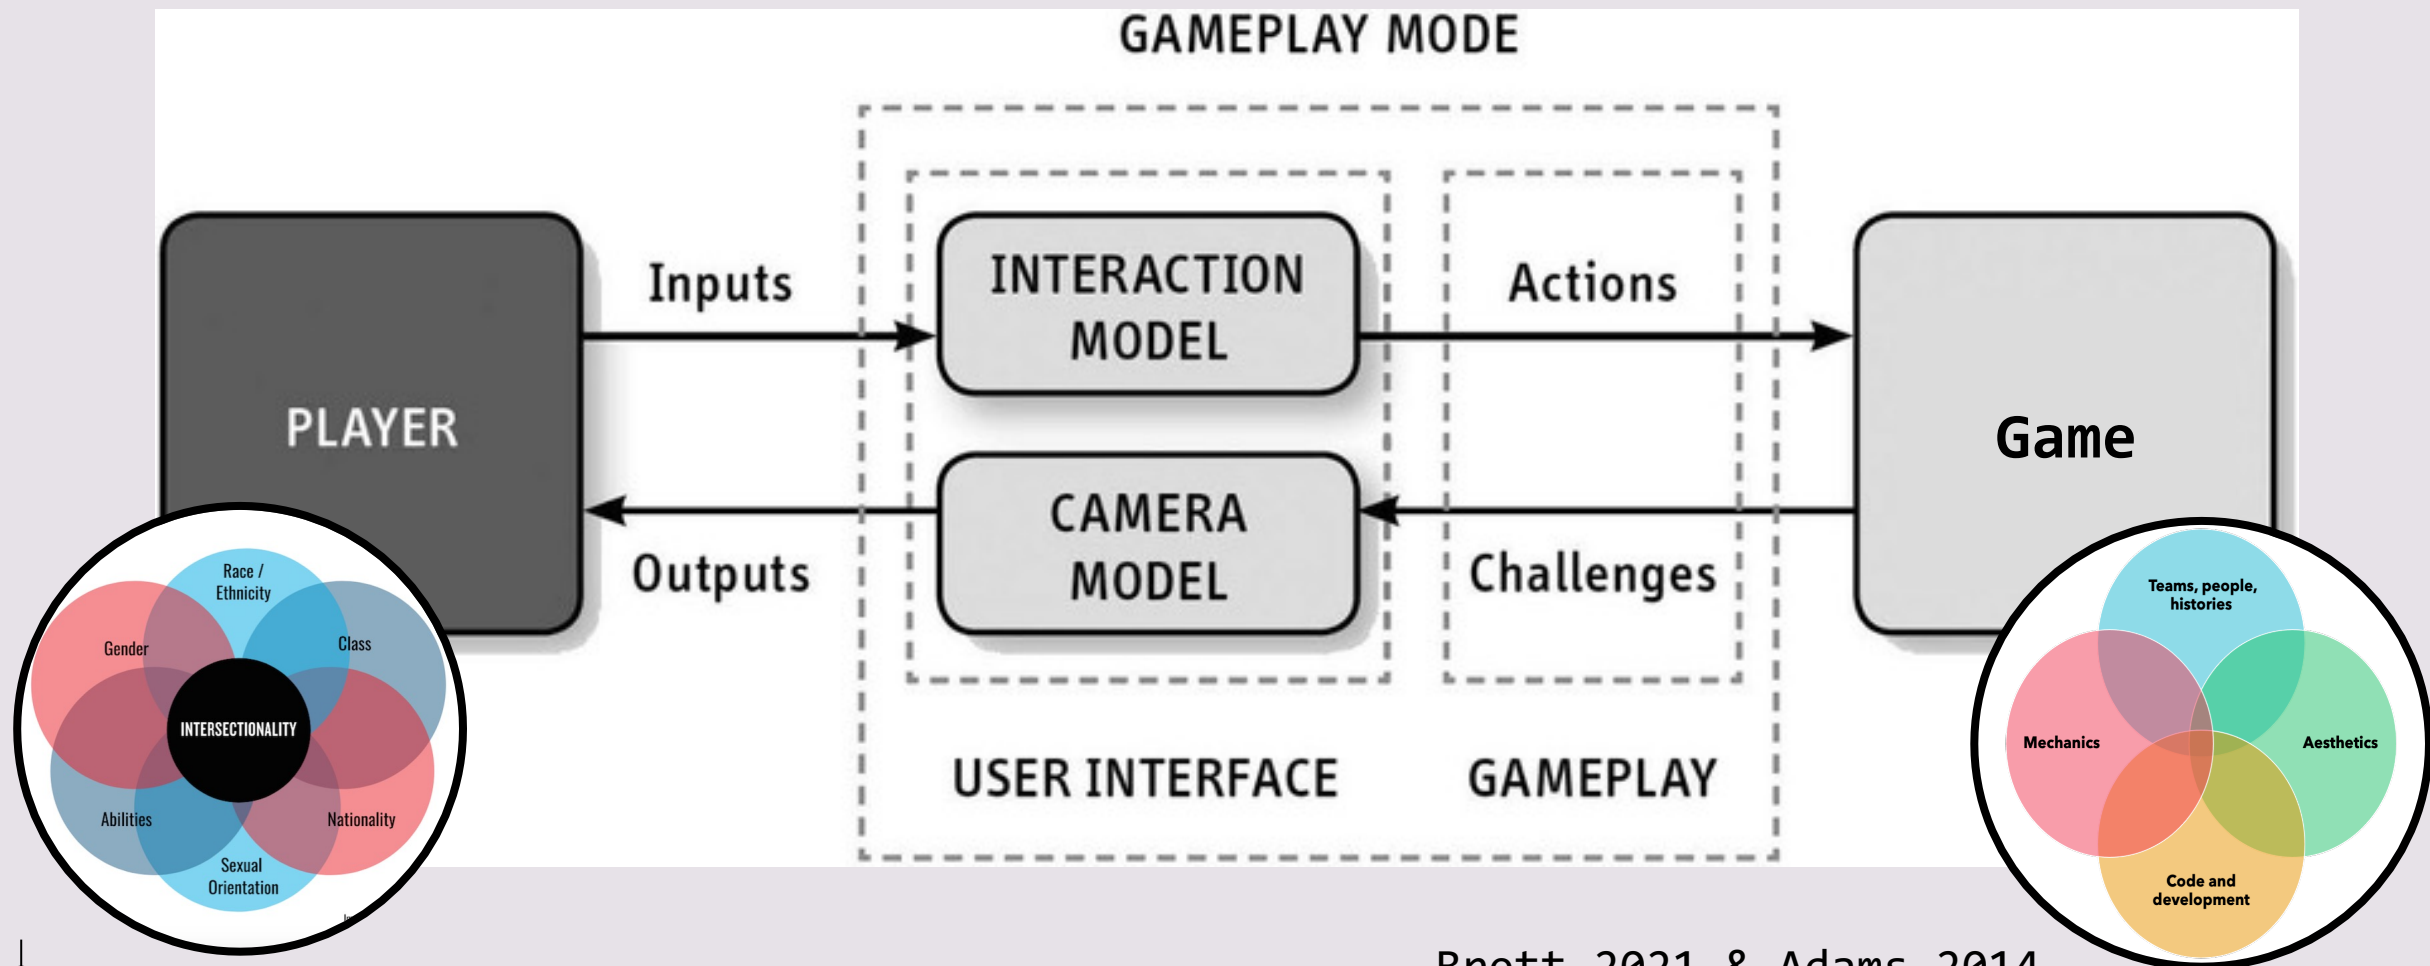

Short Answer: No

Long Answer: Convolutated, but I take with me the knowledges of extremist politics

# How Games and Players Talk (Politics)

Brett 2021 & Adams 2014

***How Games Talk: Challenges***

***How Players Talk: Actions***

**When the Game Starts the Conversation:  
Politically Charged Challenges**

# **Moments of Political Gameplay:**

## **The Political Conversations We Have with Games**

Moments where the game and the player interact to **reproduce** political practices.

Players and games mobilize each other to Learn, act, and practice Far-Right politics.

Games configure their players, allowing progression through the game only if the players recognize what they are being prompted to do, and comply with these coded instructions. The analysis of the pleasures of gameplay must take the agency of the players and the game technologies as central, as well as those between players and the game

# ***Conversations of White Supremacy are About Love, Not Hate***

The depths of Love are rooted and very deep in a real white nationalist's soul and spirit, no form of "hate" could even begin to compare. At least not a hate motivated by ungrounded reasoning.

It is not hate that makes the average white man look upon a mixed race couple with a scowl on his face and loathing in his heart.

[...]

It is not hate that makes the white workingman curse about the latest boatload of aliens dumped on our shores to be given job preference over the white citizen who built this land. [...]

No, it's not hate. It is love.

– Aryan Nations Web site

Ahmed 2004

# **Love Creates Invisible Others**

- Who is the target and why

It is the love of white, or those recognizable as white, that supposedly explains this shared “communal” visceral response of hate. – Ahmed

# ***Effects of Moments of Political Gameplay***

Participating and recreating  
game far-right talking points.

Players learn the political narratives  
and messages of the game

The player reformulates their political identity in  
relation to the conversations enabled both by the design  
of the game, and the player's initial positionality

# Talking Politics with Games

Noel Brett

[brettn@mcmaster.ca](mailto:brettn@mcmaster.ca)

• Moments of political gameplay are political conversations and interactions *between* player and game

• Players and games are laden with political elements

• Politics come into gameplay via politically charged actions or challenges

• Talking about these politics concretizes the politics of the player
