

Comments on assignment2

I. Bourguiba

March 15, 2006

The assignment is / 90 (50 for Part A and 40 for Part B)

1 Part B

The marking scheme for part B is the following:

- 1: 10 pt
- 2: 10 pt
- 3: 10 pt
- 4: 10 pt

Comments:

Exercise 1 and 3 were well done by most of the students.

For Exercise 2 some students did not prove the $(s + 1)^2$ upper bound (3 pt for that part).

For Exercise 4, no partial mark, either it is correct (see solution) or not.
